Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Peters (4,191,543).

Peters teaches an air blower apparatus including a fan unit (29), a fan unit housing (17) having first buffer space (47) capable of returning air via duct (42, 43) deflected from the space (see Fig. 1), and a second buffer space (24) and an HEPA filter (F). Note in claim 1, the phrase “for blowing air via an air filter to a recording medium being measured and to a recording apparatus for recording data on the recording medium” in the preamble has not been given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self-contained description of the structure not depending for completeness upon the introductory clause. Kropa v. Robie, 88 USPQ 478 (CCPA 1951). Also noted in claim 1, the phrases “provided above said recording medium”, “a fan unit provided above”, “directly substantially downwardly toward said recording medium”, and “wherein said fan unit inhales ... so as to provide high pressure state” are intended usage and the device of Peters is capable of such intended usage. It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does

not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ 2d 1647 (1987).

Claim Objections

Claims 5 and 6 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 5 and 6 do not further limit claim 1 as such is not a positive limitation of the air blower apparatus but further limits the recording apparatus.

Allowable Subject Matter

Claims 7 and 9-12 allowed.

The following is an examiner's statement of reasons for allowance: None of the prior arts discloses an inspection apparatus housing comprising an air blower apparatus for use in an inspection apparatus, a recording apparatus for recording data on recording medium, wherein the air blowing device comprises a fan unit provided above the recording medium, a fan unit housing with a first buffer space and a second buffer space temporarily accumulating the air discharged from the fan so as to provide high pressure state.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
